

Open Space Plan, Phase II Final Report

Errata

The list of Working Group participants (on pages 30 and 31) should include the following:

“Dr. Ann Croissant represented the San Gabriel Regional Mountains Conservancy. Dr. Croissant is a former Professor of Landscape Architecture at Cal Poly Pomona and has extensive knowledge concerning habitat issues, the San Gabriel Mountains and the preservation of open space.”

The Monitoring and Assessment matrix (on pages 104 and 105) should read as follows:

Monitoring and Assessment

Agencies: Lead Entity with primary responsibility for subsequent plans, and the RMC for implementation of *Common Ground* within the RMC territory.

Potential Resource Partners: Lead Entity for subsequent plans, and RMC for *Common Ground*.

Stakeholders: Groups involved in each subsequent plan.

Conceptual Scope: The RMC, with partners, will work to develop an assessment process for restoration of the watersheds, and monitor progress towards meeting the goals described herein. At a minimum, the periodic assessment process shall occur at ten-year intervals, or more often if deemed practical. This process shall utilize quantifiable methods wherever feasible and input from a technical advisory committee, and shall include stakeholder involvement in the design, implementation, and review of the assessments.

Issues: Should monitoring and assessment be a requirement for each subsequent plan?

Does this only relate to *Common Ground*?
